## Installation Guide

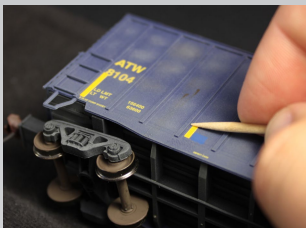

### « Step 1 - Apply

Place model on side - cushion to protect details. Remove reflector from backing with tweezers. Apply reflector to car side using photos or placement guide. Avoid rivets or other raised detail if possible.

### Step 2 - Burnish »

Adjust reflector to desired position. Using toothpick or other small blunt object, burnish reflector onto surface of car. Do not use metallic objects that may scratch surrounding surface.

### « Step 3 - Seal

Once satisfied with reflector placement, seal with clear finish to help blend reflectors into model (if desired).

**Place your model into service!**
